SKILLS

- Typescript, Python, C++
- React, MongoDB, HDFS, Qt
- Fastify, Docker
- Project Management Tools
- Artificial Intelligence
- Network/Socket Programming
- Unit tests

EDUCATION

MAIN SCHOOL - FRANCE

Epitech - Master
2019 - 2024

Skills/Topics:

Memory Management (C), GUI,
Low level programming, OOP, AI
Multithreading, Web dev, Docker

SCHOOL ABROAD - CHINA

Tsinghua University - Year
abroad 2022 - 2023

Skills/Topics:

Parallel computing, Big data systems,
Distributed databases, Combinatorics
and Algorithms

PROFILE

I'm a hard working developer interested in lots of topics such as artificial intelligence, front and back end web development, low level C and C++ coding, building big data systems, using distributed databases etc...

EXPERIENCE

FREELANCE: FULLSTACK WEB DEV

LiveLinX, April 2023, 4 months

I'm helping them develop their innovative solution by working as a fullstack developer with them.

Technos: AWS, React, Typescript, GraphQL

INTERN: APPLICATIONS DEVELOPER

RTech, April 2022, 4 months

Responsible for creating an application capable of:

- Detecting small pieces of trash in jam on a conveyor belt using Machine Learning.
- Removing those pieces in real time using tracking technology and a robot arm.

INTERN: APPLICATIONS DEVELOPER

RTech, August 2020, 4 months

Responsible for creating a graphical user interface for one of their computing software for simulating the reentry of satellites into our atmosphere.

The interface was built using C++ with Qt

MORE PROJECTS

The projects I'm the most proud about are listed in my portfolio which is available here:
