

NIKOLAJ DE SMET

FULLSTACK WEB & DEVOPS ENGINEER

✉ desmet.informatique@gmail.com  portfolio.de-smet.dev  github.com/Niko464 in linkedin.com/in/nikolaj-de-smet

PROFILE

Fullstack web developer and DevOps engineer with 3+ years building and operating production web apps end-to-end — React/TypeScript frontends, Node/NestJS + GraphQL backends, and the Kubernetes clusters they run on. Currently lead engineer at LiveLinx.

EXPERIENCE

Lead Engineer — Freelance · LiveLinx

April 2023 – Present · Remote

- Lead engineer for LiveLinx's digital learning platform for the medical sector — where hospitals and clinicians build training content and run live in-person events powered by the platform — leading its development end-to-end across frontend, backend and infrastructure.
- Build and maintain the product with React, TypeScript and GraphQL on AWS.
- Operate production infrastructure: administer a Kubernetes cluster and Linux servers, handling deployments, scaling, monitoring and reliability.

Tech stack: React · TypeScript · GraphQL · Node.js · AWS · Kubernetes · Docker · Linux

CTO — RLRP · Ascension Project

Oct 2025 – Present

- Built the entire Ascension project end-to-end — a multiplayer roleplay game on the s&b engine — from gameplay code (C#/.NET) to backend, admin panel and infrastructure.
- Built and maintain the hosting infrastructure for 100 concurrent players: production and staging environments and several dedicated game servers coordinated by one central backend, with monitoring (Prometheus, Grafana) and automated off-site backups.
- Developed the NestJS/PostgreSQL backend (REST + WebSocket) and a React admin panel for player management, staff tools and remote game-server control.

Tech stack: C# · .NET · React · TypeScript · NestJS · PostgreSQL · Docker · Linux

Fullstack Developer — Freelance · reno.energy

2024 · 1 month

- Designed and built a public quote simulator (reno.energy/simulateur) letting customers configure their installation and request a quote online.

Tech stack: React · TypeScript

Fullstack Developer — Freelance · Natan (fashion)

Nov 2024 – May 2025 · 6 months

- Built an internal product-management tool (app.natan.be) to centrally track products, variants, pricing and imagery alongside customers and sales.

Tech stack: React · TypeScript · GraphQL

Applications Developer — Intern · RTech

Aug 2020 & Apr 2022 · 2 internships of 4 months

- Built an ML application detecting small contaminants in jam on a conveyor belt and removing them in real time via object tracking and a robotic arm (2022).
- Developed a C++/Qt desktop GUI for software simulating the atmospheric re-entry of satellites (2020).

Tech stack: Python · Machine Learning · Computer Vision · C++ · Qt

SKILLS

LANGUAGES

TypeScript / JavaScript, C#, Python, C++, C

FRONTEND

React, Tailwind CSS, shadcn/ui, MUI, React Query, Zustand, Redux, Qt

BACKEND & APIS

Node.js, NestJS, Express, Fastify, GraphQL (Apollo, type-graphql), REST

DATABASES

PostgreSQL, MongoDB, Redis, HDFS · ORMs: Prisma, TypeORM

DEVOPS & INFRA

Kubernetes, Docker, AWS, Linux servers, CI/CD

TESTING

Cypress, Playwright, unit testing

OTHER

Machine Learning, Network/Socket programming, Multithreading

EDUCATION

Master's in Computer Science

Epitech · France · 2019 – 2024

Memory management (C), low-level & OOP, GUI, multithreading, web dev, Docker, AI

Exchange Year

Tsinghua University · China · 2022 – 2023

Parallel computing, big-data systems, distributed databases, combinatorics & algorithms

LANGUAGES

Dutch	Native
French	Native (bilingual)
English	Fluent (C1/C2)
Spanish	Basic

PROJECTS

Selected projects I'm most proud of are in my portfolio: portfolio.de-smet.dev
